APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.65 cubic feet per second.

Actual construction work shall begin on or before July 8, 1922.

Proof of commencement of work shall be filed before August 8, 1922.

Work must be prosecuted with reasonable diligence and be completed on or before July 8, 1924.

Proof of completion of work shall be filed before August 8, 1924.

Application of water to beneficial use shall be made on or before October 8, 1927.

Proof of the application of water to beneficial use must be filed with State Engineer on or before November 8, 1927.

Map filed NOV - 7 1919

Proof of labor filed JUN - 6 1923

Proof of completion of work filed JUN - 6 1923

Cancelled FEB 13 1940 because of failure of applicant to comply with the provisions of permit

Alfred Morris State Engineer

WITNESS MY HAND AND SEAL this 8th day

of February, 1922.

J.H. Sengman State Engineer.

This permit is issued subject to all prior rights on the source. The amount of water herein granted is placed at the statutory allowance of 0.65 cubic foot of water per second for the land proposed to be irrigated, notwithstanding the fact that a portion of the land herein proposed to be irrigated is also included in permit No. 5824, so that such amount of water may be used in the event there is a shortage in Big Creek under permit No. 5824. However, the total amount of water which can be diverted under the three permits, namely Nos. 5824, 5825, and 5826, shall not exceed the statutory allowance of water for the total acreage of land proposed to be irrigated as shown by the description by legal subdivisions. Applicant will be required at the time of filing proofs of beneficial use and maps to segregate areas irrigated from each source under said three permits so that certificates may be issued showing the lands to which the water of each source is appurtenant. A substantial headgate and weir must be installed and maintained at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times. It is distinctly understood that applicant agrees to the terms herein contained.
